

Power Window Replacement Parts

Is your power window mechanism not working properly? Maybe the window doesn't go up or down at all, maybe it only goes in one direction, or perhaps it's moving slower than it should. Your power window components could be in need of repair or replacement. ACI, a Standard Motor Products company, provides direct factory fit replacement parts which could be just what you need.

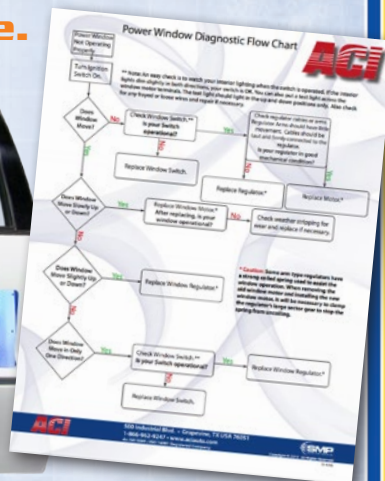

Be careful when replacing window motors. Some arm-type regulators have a strong coiled spring used to assist the window operation. When removing the old window motor and installing the new motor, it will be necessary to clamp the regulator's large sector gear to stop the spring from uncoiling.

Check the regulator cables or arms. Regulator Arms should have little movement. Cables should be taut and firmly connected to the regulator.

An easy check to see if your window switch is operational is to watch your interior lighting when the switch is operated. If the interior lights dim slightly in both directions, your switch is OK. You can also put a test light across the window motor terminals. The test light should light in the up and down positions only. Also check for any frayed or loose wires and repair if necessary.

About ACI

ACI, established over 35 years ago, is a pioneer in the development of Automotive Windshield Washer Pumps and Power Window Motors for the Automotive Aftermarket. During this time, ACI has established itself as the industry leader in providing the most complete product offering combined with the "best in class" quality available in the market today.

ACI, located in Grapevine, Texas, continues to manufacture many of the motors and washer pumps in its US manufacturing facility for distribution to both domestic and international markets. The Strategic decision to supply "exact fit" products combined with an intensive product validation process has allowed ACI to maintain its position as the industry leader in this product category.

BY FEDERATED AUTO PARTS

Features & Benefits

Products Manufactured by ACI

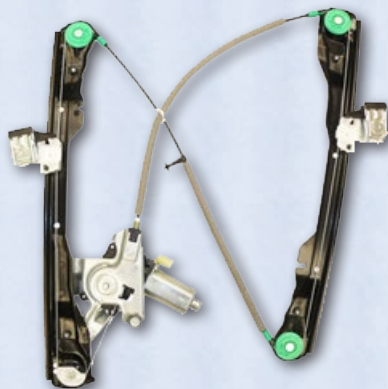

Power Window Motors

- Automotive Aftermarket, OES, Niche OE Markets
- Domestic and Import Applications
- Meets or Exceeds OEM Specifications
- Exact Fit for Ease of Installation

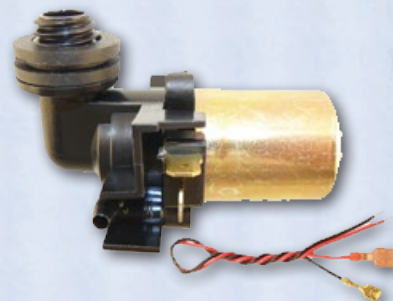

Power Window Regulators

- Automotive Aftermarket
- Domestic and Import Applications
- Design Enhancements for Longer Life
- Exact Fit for Ease Of Installation

Windshield Washer Pumps

- Automotive Aftermarket, Niche OE Markets
- Domestic, Import and Light Truck Applications
- Direct Fit
- Enhanced Design for Longer Life
- Universal Pump Kit also Available

Power Window Switches

- Automotive Aftermarket, Specialty Markets
- Offering Covers 25 Years of Popular Model Applications
- Domestic and Import Applications
